

Please fill out all the highlighted fields. Failure to do so may result in delayed testing and delivery of results.

PATIENT INFORMATION
Sema4 will use this information to contact the patient via automatic email, SMS, and/or phone regarding payment, testing status, and online results access.
PATIENT EMAIL ADDRESS, LAST NAME, DATE OF BIRTH, BIOLOGICAL GENDER, PARTNER / SPOUSE LAST NAME, CLIENT MRN, ADDRESS

ORDERING PHYSICIAN INFORMATION
NAME, ADDRESS, CLINIC / INSTITUTION, TELEPHONE, FAX, PHYSICIAN SIGNATURE OF CONSENT (REQUIRED), SIGNATURE, DATE

BILLING INFORMATION
Bill to: Client/Institution, Insurance, Self Pay/No Insurance
POLICYHOLDER LAST NAME, POLICYHOLDER FIRST NAME, POLICYHOLDER DOB, INSURANCE CARRIER, INSURANCE ID, GROUP NO., BILLING ADDRESS, SECONDARY INSURANCE, SECONDARY INSURANCE NAME, GROUP NO.
Pre-Authorization #: Please include a copy of all insurance paperwork.
ASSIGNMENT AND RELEASE: I hereby authorize my insurance benefits be paid directly to the provider and I understand that I am financially responsible for uncovered services.

INDICATIONS FOR TESTING
ICD10 Dx CODE(S) (Required)
009.511 Advanced Maternal Age, First Trimester
009.512 Advanced Maternal Age, Second Trimester
N96 Recurrent pregnancy loss
282.7 Family history of congenital malformations, deformations, and chromosomal abnormalities
284.81 Family history of carrier of genetic disease
028.3 Abnormal ultrasonic finding on antenatal screening of mother
028.5 Abnormal chromosomal and genetic finding on antenatal screening of mother
N46 Male infertility
N97 Female infertility
Z31.430 Encounter of female for testing for genetic disease carrier status for procreative management
Z31.440 Encounter of male for testing for genetic disease carrier for procreative management
002.89 Other abnormal products of conception
Other
COLLECTION DATE, # OF BLOOD TUBES SENT: YELLOW, PURPLE, BCT, GREEN
SPECIMEN TYPE: (Please contact laboratory for alternate specimen types)
Maternal: Peripheral Blood, Saliva, Other
Paternal: Peripheral Blood, Saliva, Other
Fetal: Amniotic Fluid, Chorionic Villi, POC, Other
PREGNANCY HISTORY: Gestational Age, Weeks, Days or EDD, (Required for fetal samples)
Pregnancy conceived: IVF, Egg donor/gestational carrier, Age of genetic mother (at time of retrieval)

LABORATORY TEST(S) ORDERED

Test Selection (Required)
Parental Carrier Screening
Carrier Screening Clinical Information:
Patient ancestry, Preferred Language, History of BMT or recent blood transfusion in the last 4 weeks, Is the patient or their partner pregnant?, Is the patient currently using birth control medication?, Previous carrier screening?, Family History of, Partner Carrier of, Expanded Carrier Screen (283 genes), Standard Pan-ethnic Panel (4 genes), High Frequency Pan-ethnic Panel (11 genes), ECS 39 (39 genes), ECS 152 (152 genes), Comprehensive Jewish Carrier Screen (101 genes), Ashkenazi Jewish Disorders (47+17 genes), Sephardi-Mizrahi Jewish Disorders (37+17 genes), X-Linked Supplemental Panel (21 genes), Single Gene Variant(s), Phase analysis, PGT set-up, Test only for AR disorders partner screened positive for - hold sample pending partner results, NGS re-analysis of ECS 281 + enhancements included in ECS 283, Previous test order date, Other

Infertility/Pregnancy Loss
Test for Microdeletions of Y Chromosome (male), Thrombophilia Test (2 variants below), Cystic Fibrosis with CFTR Intron 9 PolyT (male), F2 - c.*97G>A, F5 - c.1601G>A (p.Arg534Gln), MTHFR - c.665C>T (p.Ala222Val) add-on
Cytogenetics and Cytogenomics
CHROMOSOME ANALYSIS
Chromosome Analysis (includes AFP with amniotic fluid), Additional Cell Culture: Hold, Grow, Includes reflex to array if no growth for POC specimens, Mosaicism study, Reflex to array if normal chromosomes (select option below)
CHROMOSOMAL MICROARRAY: Array Comparative Genomic Hybridization (aCGH) 180K + SNP
For prenatal specimens, please submit maternal blood for Maternal Cell Contamination (MCC) For all specimens, please include blood (1 EDTA purple top, 1 Sodium heparin green top) from parents of the proband/pregnancy for array follow up if available
Prenatal Chromosomal Microarray (lower resolution)
High Resolution Chromosomal Microarray prenatal/postnatal/POC
POC Microarray Plus: Includes high resolution microarray analysis, triploidy detection, UPD analysis, molar pregnancy analysis and MCC studies with submission of maternal blood or saliva sample.
Parental array followup
Proband SEMA4 Lab ID, Name, DOB

Specimen Required: Two 10 ML Whole Blood BCT Streck Tubes
Panorama is a trademark of Natera, Inc.
PANORAMA PRENATAL PANEL (Screening chromosomes 13, 18, 21, X & Y, Triploidy, and 22q11.2 deletion syndrome)
PANORAMA EXTENDED PANEL (Screening chromosomes 13, 18, 21, X & Y, Triploidy, 22q11.2 deletion syndrome, 1p36 deletion syndrome, Cri-du-chat syndrome, Angelman syndrome, and Prader-Willi syndrome)
Ordering Physician, Fax #, Gestational Age, Maternal Weight, Height
Was an egg donor or surrogate used?
Is this a multiple gestation pregnancy?
Are you submitting a father sample?
The presence of a father sample decreases the possibility of no results
Do you want the sex of the fetus included in this report?
Do you wish to opt out for 22Q11.2 Del?
Is this a Z34.80 Pregnancy Status?
ICD10 Dx CODE(s)
009.511, 009.512, 009.521, 009.522, Z13.79, 028.1, 028.3, Z31.438, Other

FLUORESCENT in situ HYBRIDIZATION (FISH)
Aneuploidy FISH (chromosomes 13,18,21,X,Y)
1p36 deletion syndrome (1p36.3)
22q deletion/DiGeorge syndrome (22q11.2)
CHARGE syndrome (8q12.1-q12.2)
Cri-du-chat syndrome (5p15.2)
Kallman syndrome (Xp22.3)
Langer-Giedion syndrome (8q23.3-q24.11)
Miller-Dieker syndrome (17p13.3)
SRY (Yp11.3)
Prader-Willi/Angelman (15q11.2)
Rubenstein-Taybi syndrome (16p13.3)
Smith-Magenis syndrome (17p11.2)
Sotos syndrome (5q35)
STS deficiency (Xp22.3)
Williams syndrome (7q11.23)
Wolf-Hirschhorn syndrome (4p16.3)
FISH other:
Prenatal Diagnostic Testing
FGFR3 Hotspot Panel
Reflex to sequencing if negative
Maternal Cell Contamination
Other:
Limb Defects Next Gen Sequencing Panel (7 genes)
Noonan Spectrum Disorders Panel (18 genes)
Single gene/Diagnostic testing
Gene:
Targeted testing: Maternal variant, Paternal variant
Biochemical testing: Tay-Sachs enzyme analysis, Sandhoff enzyme analysis

Limitations: As this assay is a screening test and not diagnostic, false positive and false negatives can occur. Positive results need diagnostic confirmation by alternative testing methods. Negative results do not fully exclude the diagnosis of any of the syndromes or the possibility of other chromosomal abnormalities or birth defects. Potential sources of inaccurate results include, but are not limited to, mosaicism, low fetal fraction, limitations of current diagnostic techniques, or misidentification of samples. Results should be interpreted by a clinician in the context of clinical and familial data, and the patient should receive genetic counseling.

Maternal blood is required for all prenatal specimens for maternal cell contamination.
If patient/partner was NOT tested at Sema4, parental bloods are required (5-10mL EDTA) to confirm the variant in-house. Please also provide a copy of any previous results.
Please contact the laboratory for all prenatal molecular/biochemical testing

Expanded Carrier Screen Panel includes:

- Abetalipoproteinemia ◆●▼
- Achromatopsia ▼
- Acrodermatitis Enteropathica
- Acute Infantile Liver Failure ◆■▼
- Acyl-CoA Oxidase I Deficiency
- Adenosine Deaminase Deficiency ▼
- Adrenoleukodystrophy, X-Linked ◆■▼
- Aicardi-Goutières Syndrome (SAMHD1-Related)
- Alpha-Mannosidosis
- Alpha-Thalassemia ▲◆●■▼
- Alpha-Thalassemia Mental Retardation Syndrome
- Alport Syndrome (COL4A3-Related) ◆●▼
- Alport Syndrome (COL4A4-Related)
- Alport Syndrome (COL4A5-Related)
- Alstrom Syndrome
- Andermann Syndrome ▼
- Argininosuccinic Aciduria ▼
- Aromatase Deficiency
- Arthrogryposis, Mental Retardation, and Seizures ◆●▼
- Asparagine Synthetase Deficiency ◆■▼
- Aspartylglycosaminuria ▼
- Ataxia With Isolated Vitamin E Deficiency
- Ataxia-Telangiectasia ◆■▼
- Autosomal Recessive Spastic Ataxia of Charlevoix-Saguenay ▼
- Bardet-Biedl Syndrome (BBS10-Related)
- Bardet-Biedl Syndrome (BBS12-Related)
- Bardet-Biedl Syndrome (BBS1-Related) ▼
- Bardet-Biedl Syndrome (BBS2-Related) ◆●▼
- Bare Lymphocyte Syndrome, Type II
- Bartter Syndrome, Type 4A
- Bernard-Soulier Syndrome, Type A1
- Bernard-Soulier Syndrome, Type C
- 3-Beta-Hydroxysteroid Dehydrogenase Type II Deficiency
- Beta-Ketothiolase Deficiency
- Beta-Globin-Related Hemoglobinopathies ▲◆●■●✳▼
- Bilateral Frontoparietal Polymicrogyria
- Biotinidase Deficiency ▼
- Bloom Syndrome ◆●●✳▼
- Canavan Disease ◆●●✳▼
- Carbamoylphosphate Synthetase I Deficiency
- Carnitine Palmitoyltransferase IA Deficiency
- Carnitine Palmitoyltransferase II Deficiency ◆●●▼
- Carpenter Syndrome

Informed Consent for Genetic Testing

I, _____, hereby request genetic testing, which may include molecular, cytogenetic and/or biochemical analyses, for

Myself

My child _____

I have received verbal and written information (please see sema4.com/testcatalog for test-specific information sheet) from my physician or from a genetic counselor that described, in words that I understood, the nature of the genetic testing that I/my child am about to undergo.

I understand that specimen(s), such as a peripheral blood, saliva, cheek swab, dried blood spot, skin biopsy, amniotic fluid, chorionic villi and/or urine sample, will be taken from me/my child. I understand that the samples will be used for determining if I/my child have a genetic disease, are carriers of a genetic disease, or are more likely to develop a genetic disease or condition.

The nature of the genetic test(s) that have been ordered in connection with this consent has been explained to me and the accuracy of the test and its risks and limitations have been detailed. I understand that infrequent errors may occur, even though the likelihood of an incorrect diagnosis or a misinterpretation of the result is extremely small. The likelihood of this occurring has been estimated to be less than 1%. I understand that a negative result reduces, but does not eliminate, the possibility that I/my child carry a mutation(s) in the gene(s) analyzed or in other gene(s) that are not included in the test.

I understand that no test will be performed on my sample other than the one(s) authorized by me and my healthcare provider. I have reviewed the test order made in connection with this consent, and I hereby give consent to have my specimen tested as set forth in the order.

De-identified research

Sema4 may de-identify and use all data and information generated and received in connection with this test to support medical and academic research relating to health, disease prevention, drug development, and other scientific purposes, and I will receive no compensation in connection with such research. Data and information are "de-identified" by removing any information that could be used to identify a specific person, such as a name, email address, or date of birth.

Sema4 may also give the de-identified data and information to its research partners and may submit it to research databases for use in scientific and medical research, including scientific databases that are maintained by the federal government, such as a database kept by the National Institutes of Health ("NIH") (an agency of the federal government that funds research). Researchers have to apply to the NIH to see the information in the database.

If I do not want to have any of my de-identified data and information used in research consistent with this consent, I may initial here _____, or I may withdraw this consent by contacting Sema4, including by emailing privacy@sema4.com.

Permission to contact

I understand that Sema4 may wish to contact me/my child in the future, including for the following reasons: research purposes, the provision of general information about research findings, and/or the provision of information about the results of tests on my/my child's sample(s). I understand that I may notify Sema4 to opt out of such future contact, including by emailing privacy@sema4.com.

I understand that this testing may yield results that are of unknown clinical significance and that parental or other relative's specimens may also be tested to determine whether a specific finding was inherited. In addition, incidental findings that are not related to the primary diagnosis may be identified in me/my child. An error in the diagnosis may occur if the true biological relationships of the family members involved are not as I have stated and this test may detect non-paternity.

The results of my/my child's test will be explained to me by a genetic counselor or by my physician who will have the opportunity to discuss my results with a geneticist. I have had the opportunity to have all of my questions answered. If I am signing this form on behalf of a minor for whom I am the legal guardian, I am satisfied that I have received enough information to sign on his or her behalf.

I understand that this consent is being obtained in order to protect my right to have all of my questions answered before testing. I understand that the results of this testing will become part of my medical record and may only be disclosed to individuals who have legal access to this record or to individuals who I designate to receive this information.

Signature of person being tested (or guardian)
